

# Workshop on water resources on April 24

By Our Staff Reporter

**UDHAGAMANDALAM, APRIL 22.** A stakeholders workshop on "The Nilgiris water resources" is scheduled to be held here on April 24.

While the Collector Supriya Sahu said on Saturday that the administration would use the workshop to plan the future course of action vis-a-vis water management, the Director of the Kotagiri-based NGO, "Keystone Foundation" Pratim Roy

said that its main purpose was to bring together a cross-section of people from the Nilgiris to discuss water issues.

It would mark the culmination of a one-year project funded by The Ford Foundation - Winrock International India.

The objectives are to identify key hill water issues and explore the way towards a sustainable management strategy - to disseminate information on water resources and evolve a

policy statement on conservation, management and development of the water resources.

Among the participants were water experts from New Delhi, Hyderabad, Bangalore and the Nilgiris.
